## *Happy Mother's Day!*

*"It is not good that man should be alone; I will make him a helper comparable to him."* (Gen. 2:18)  
 With these simple words spoken by God, the work of creating woman was begun, but in this marvelous act, God did much more than just provide man with a companion. He created marriage, the family, and the means by which children would be brought into this world. However, the wonder of God's creation doesn't stop there. In woman, God created a being full of love and compassion, with a nurturing heart and gentle spirit, uniquely qualified to fill the position of "mother." She was designed to be strong and resourceful, patient and kind, a teacher, provider, comforter, and caregiver. What a blessing mothers are, and what an amazing testament to the wisdom, power, and love of God!

In a world in which there is currently so much confusion concerning gender and roles, and in which the virtues and blessings of motherhood are being so harshly attacked, I am very thankful that we still have the opportunity to celebrate Mother's Day. What a wonderful occasion it is to let those special women in our lives know how much we love and appreciate them. But, even more importantly, days such as this provide a special opportunity for us to give our thanks and praise to God for His goodness and love; after all, it was He who envisioned, designed, and created woman as the perfect solution to the "not good" problem of man being alone.

Thank you, God, for this wonderful gift; and, thank you, mothers, for all that you are and all that you do to make our families complete and to fill our homes with love. Happy Mother's Day!
